Interviews

When being interviewed by members of the press, or independent media producers it is important to maintain the distinction between Lucas Film and the 501st Legion. While we are typically happy to grant interviews requests for interviews need to be evaluated to make sure that we will not be put into a situation where we may be requested to speak on topics not related to the 501st. Legion.

Lucas Film has requested that when conducting an interview we do so with "buckets off" to make a clear delineation between our membership and the characters we portray. For example it's appropriate for us to discuss specific charity involvement as a member but not appropriate for Darth Vader to say that "XYZ Foundation" is his favorite charity.

Interview Tips

- **Buckets off:** Identify yourself as a member of the 501st either by name or TK-ID.
- **Avoid controversial topics:** No discussions of Religious or Political issues.
- **Promote the Legion is a favorable light.**
- **Be Positive:** Don't comment negatively on other Costuming Groups and Star Wars organizations.
- **We Build our own costumes:** stress that our costumes are all fan made.

Talking Points

- The Legion officially began in 1997.

Logos

EPS LOGOS (for Print): The following eps files are intended for PRINT USE, and work well in cases where the logo must be reproduced with sharp detail or at large sizes (such as banners or posters). Because the logo is usually seen on a dark background, the color versions of these eps files have a black box beneath the actual logo art. This black box may be deleted to accommodate the background of your choice. Because of the nature of vector art, these files may be used at any size. Always remember to resize proportionately. We strongly recommend the use of Adobe Photoshop or Adobe Illustrator software to resize these files. the 501st Legion Logos are for use by The Legion Only. Command and Staff my down load the image files hfrom the [Legion PR Forum](#). All other Legion members may request image files from their PR Officer or unit Command.

NO DISTORTION	NO COLOR VARIATIONS	NO ADDITIONS TO EXISTING LOGO	NO FUNNY EFFECTS	NO "COOL" EFFECTS	NO TEXT CHANGES	NO PARTIAL USE OF LOGO

Some other tips:

- **DO** try to use the Master Banner Logo and Master Stacked Logo on dark backgrounds.
- **DO** try to link back to www.501st.com through the image.
- **DO** try to use the logo along as well as your unit logo.
- **DO NOT** put the Legion logo too close to another logo. Try to maintain a clearance of 1/2 the vertical height on all sides.
- **DO NOT** use excessive occurrences of any 501st logo on the same page.
- **DO NOT** use the logo as a repeating pattern.

FONT USAGE:

The 501st Legion logos use the following fonts and you should feel free to use these in conjunction with your project to keep a consistent 501st Legion theme:

Fonts

The following fonts are generally used in the 501st Legion Publications and PR material. While other fonts may be used it is recommended that you submit a mock up of your PR material to the [Legion Public Relations Officer](#) if you are using nonstandard fonts. **Vader's Fist**

The Vader's Fist font was developed by Dean Plantamura TK-0899 and is for **501st Legion USE ONLY** If you can't agree to this, then do not download the font! Legion Command has granted permission to release this font but under the rule that it is not to be distributed outside the Legion nor should it be used for non-Legion purposes. If you have any questions regarding usage, please contact the [Legion Merchandise and Branding Officer](#).

There are many characters in this font, and I tried to accommodate many of our non-English members by including "foreign" characters. You will also find many different types of trooper shapes which provide alternate characters so you don't have to use the same trooper for words with repeating letters. There are 2 special characters for the "ON" combination of letters to match the way we display the word LEGION in our banner logo.

It really helps to have some kind of software to pick specific characters. There is a function of Adobe Illustrator, for example, called "Glyphs" so you don't have to know the specific keystroke.

The PC equivalent of a Glyphs palette is Character Map. You might find it in Programs>Accessories>System Tools>Character Map. You may need to type Unicode to get specific characters.
